# **Activity 1**

## Formula: Assets = Liabilities + Owner's Equity

Instructions: Find the missing value.

- 1. Assets = \$15,000, Liabilities = \$4,000. What is Owner's Equity? \_\_\_\_\_
- 2. Liabilities = \$6,500, Owner's Equity = \$7,500. What are the Assets? \_\_\_\_\_\_
- 3. Assets = \$12,000, Owner's Equity = \$2,000. What are the Liabilities? \_\_\_\_\_\_

### **Activity 2**

# Formula: Assets = Liabilities + Owner's Capital - Owner's Withdrawals + Revenues - Expenses

Problem 1: Use the information below to find Assets.

Item	Amount (\$)
Liabilities	3,000
Owner's Capital	10,000
Owner's Withdrawals	2,000
Revenues	8,000
Expenses	5,000

Assets =

Problem 2: Use the equation to find the missing value.

- Assets = \$23,000
- Liabilities = \$7,000
- Owner's Capital = \$15,000
- Revenues = \$6,000
- Expenses = \$4,000

Withdrawals = \_\_\_\_\_

#### **Activity 3**

Sarah started a bakery by investing \$20,000. She took a loan of \$5,000 from the bank. In the first month:

- She earned \$8,000 from sales
- Spent \$3,000 on ingredients and rent
- Withdrew \$2,000 for personal use

Question: What are her total assets at the end of the month?

# **Accounting Equation Worksheet – Answer Key**

# **Activity 1: Basic Accounting Equation**

Formula: Assets = Liabilities + Owner's Equity

- 1. Assets = \$15,000, Liabilities = \$4,000
  - ➤ Owner's Equity = \$15,000 \$4,000 = \$11,000
- 2. Liabilities = \$6,500, Owner's Equity = \$7,500
  - ightharpoonup Assets = \$6,500 + \$7,500 = \$14,000
- 3. Assets = \$12,000, Owner's Equity = \$2,000
  - ightharpoonup Liabilities = \$12,000 \$2,000 = \$10,000

# **Activity 2: Extended Accounting Equation**

Formula: Assets = Liabilities + Owner's Capital – Owner's Withdrawals + Revenues – Expenses

#### Problem 1:

Assets = 
$$3,000 + 10,000 - 2,000 + 8,000 - 5,000 = $14,000$$

#### **Problem 2:**

Withdrawals = Liabilities + Capital + Revenues - Expenses - Assets

Withdrawals = 7,000 + 15,000 + 6,000 - 4,000 - 23,000 = \$1,000

#### **Activity 3**

Initial Capital = \$20,000

Loan = \$5,000 (Liability)

Revenue = \$8,000

Expense = \$3,000

Withdrawal = \$2,000

Assets = Liabilities + Owner's Capital – Withdrawals + Revenue – Expenses

Assets = 5,000 + 20,000 - 2,000 + 8,000 - 3,000 = \$28,000
